Data Transmission Failed:

A. Check COMM Mode

- Press "Menu" on the Kitchen Minder.
- Verify the last row on the Menu screen displays **Comm Mode: Serial**.
- To change, arrow down to **Comm Mode** and press the "Select" Key to switch from IR to serial.
- Retry Data Transfer
- If successful go to Step F.

B. Replug Cable

- On the back of the Kitchen Minder, unplug the cable that is in the port labeled "Programming" and plug it back in.

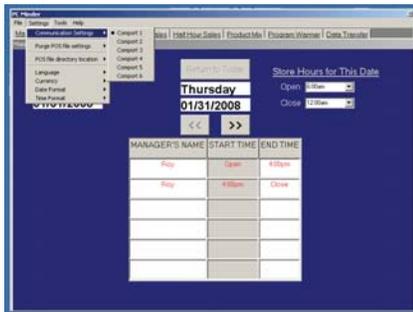

C. Check BOH Computer Corporate Restaurants

- Locate the Edgeport box and verify a flashing green status light on the front.
- Verify an adapter labeled 80114 is plugged into the back of the Edgeport box.
- Verify that a phone-like cable is plugged into the 80114 adapter.

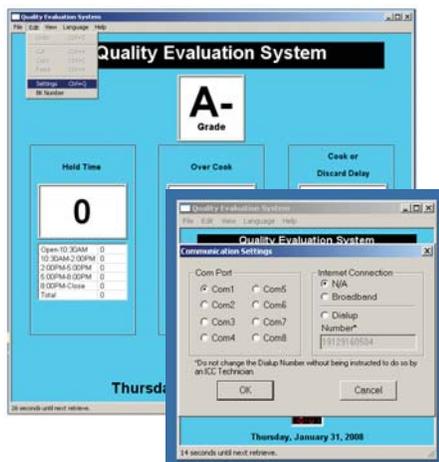

Franchise Restaurants

- Verify the 80114 is plugged into a serial port on your computer or USB serial port adapter.

D. Check PC Minder

- Open PC Minder.
- Click on Settings → Communication settings and change the selected comport To COM 1
- Recheck a Data Transfer.
- Repeat steps above for each comport until one works.
- If Data Transfer fails for each comport call ICC for support.

E. Check QES

- If Data Transfer passes, Run QES.
- Go to Edit → Settings.
- A window opens, choose the same comport that was working in PC Minder.

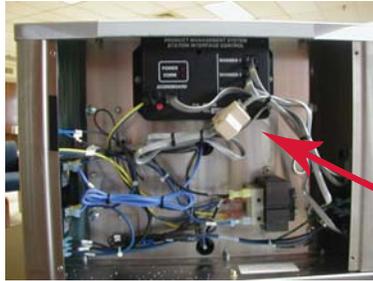

All amber lights on Timer Bars:

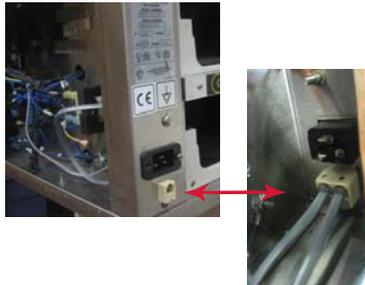

A. Remove Panel

- Remove Power Cord from back of warmer.
- Remove right hand side panel of warmer.

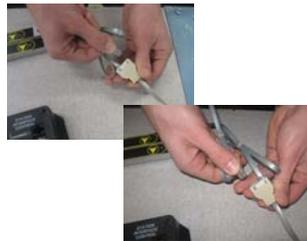

B. Locate F/B

- Picture Internal Black Box FB Master
- Locate F/B connector.

- Picture Internal Black Box Slave
OR
- External Black Box

C. Check Cables

- Check each bar by removing one connector at a time from the F/B Connector.
- If the bar still plugged in begins to work normally then the bar removed is defective.

D. Check Bars

- If lights stay orange when either bar alone is plugged into the F/B connector, plug each bar directly into the Black Box connector labeled Warmer 1.

F. Change Parts

- If both bars work correctly **CHANGE** the cable from the box to the F/B connector **AND** the F/B connector.
- If lights stay orange **CHANGE** the black box.

Main Products not displayed on Kitchen Minder :

A. Reset Power

- On the back of the Kitchen Minder slide the ON/OFF switch to off then back on.
- Verify that the display on the Kitchen Minder shows : "Sending Data Box 1" and "Sending Data Box 2".
- If both messages are shown go to Step B.
- If either message is missing go to Step E.

B. Check for Proper Daypart

- Verify that the Kitchen Minder is in DP1 or DP2.
- If in Daypart 3 then check PC Minder for proper DP3 warmer setup.

C. Start Product Location Test

- Press the "Menu" key on the Kitchen Minder.
- Arrow down to highlight "Product Location Test".
- Press Select.
- The message "Warning all active timers will be reset" Press Continue
- The find Products screen will appear.

D. Check Red light on Keyboards

Warmer 1 check

- If None is displayed on Warmer 1 Press the next key and go to Warmer 2 section
- One Product name is highlighted at the upper left corner
- Verify a single red Light is on at the timer bar by the product name pan location
- If the light is not on go to the black box and plug the keyboards into the black box connector labeled Warmer 1

Warmer 2 check

- If None is displayed on Warmer 2 Press the next key and go to Warmer 3 section
- One Product name is highlighted at the upper left corner
- Verify a single red Light is on at the timer bar by the product name pan location
- If the light is not on go to the black box and plug the keyboards into the black box connector labeled warmer 2

Warmer 3 check

- One Product name is highlighted at the upper left corner
- Verify a single red Light is on at the timer bar by the product name pan location
- If the light is not on go to the black box and plug the keyboards into the black box connector labeled warmer 3

Main Products not displayed on Kitchen Minder (cont.):

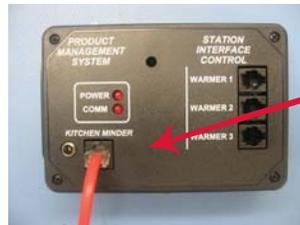

E. Check Kitchen Minder to Black box cable

- Unplug the Red cable from the Kitchen Minder and Plug back in to Com1.
- Unplug the Black cable from the Kitchen Minder and Plug back in to Com2.

Internal Black Box

- At the back of the Main master warmer Unplug the Red cable and plug back in
- At the back of the Specialty master warmer Unplug the Black cable and plug back in

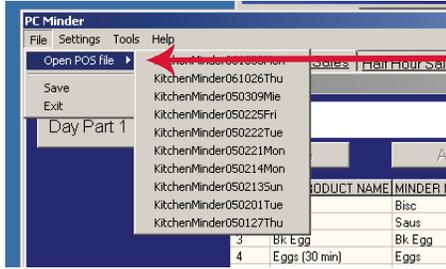

External Black Box

- At the black box by the Main warmer Unplug the Red cable and plug back in
- At the back by the Specialty warmer Unplug the Black cable and plug back in

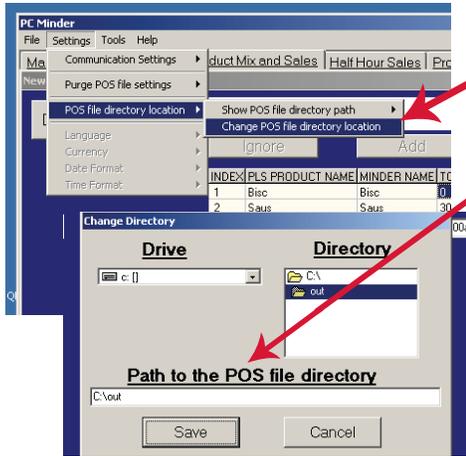

Cannot access my POS files:

A. Open PC Minder

- Click "New Product Mix and Sales" tab
- Click on File – Open POS file
- Verify a list of days appears
- Choose the same day last week
- Verify the POS file is read properly

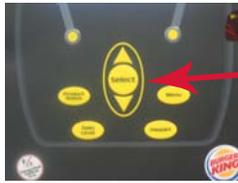

B. List of Days do not appear

- Click on Settings , POS file Directory Location
- Click on Change POS file Directory Location
- The window will appear
- Verify the path to the POS directory is C:\out
- If not then Change to C:\out
- Click Save
- Recheck Step A
- If Files are not showing the data files are not being generated properly
- Call POS vendor or ICC for Support

No Power or No Display on Kitchen Minder:

A. Press Select Key on Kitchen Minder

- Verify that the Kitchen Minder Beeps then proceed to step B
- If No beep proceed to step C

B. Adjust Contrast

- Warning:
DO NOT USE ANY FORCE WHILE ADJUSTING CONTRAST

- Locate the contrast adjust hole on the back of the Kitchen Minder
- Observe the style of adjustment

Style A – Blue shaft with slot for small flat blade screw driver

Style B – Shaft not visible Use small Philips head screw driver

- Slowly adjust clockwise and observe the Kitchen Minder Screen darkens and text appears
- If text does not appear contact ICC for support.

C. Check Kitchen Minder Power

- Verify the ON/OFF switch is in the ON position
- Inspect the Power Jack and Verify it is not loose or broken

D. Check Receptacle Power

- Locate the power outlet that the Kitchen Minder is plugged into.
- Plug a different appliance into the same outlet
- Verify there is power to the receptacle
- If no power check breakers or call maintenance
- If receptacle is working proceed to step E

E. Remove Cables

- At the back of the Kitchen Minder unplug the Red Black, Blue, and Grey cables as shown
- Turn off the Kitchen Minder then back on again.
- If the Kitchen Minder turns on, plug in each cable one at a time
- Verify the power does not go off after each cable is plugged in
- Proceed to step F if the power goes off

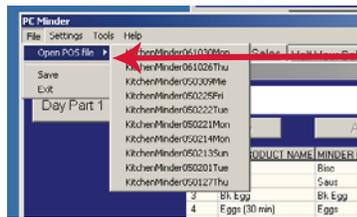

F. Remove Cable from Warmer or Box

- Trace the cable to the Main or Specialty warmer or external black box
- Remove the cable from the black box or back of warmer
- Verify the power comes back on
- If the Power does not come back on Replace the Cable
- If the Power does come back on Replace the black box

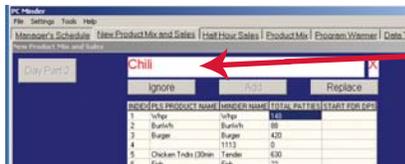

Need to add a product to Kitchen Minder:

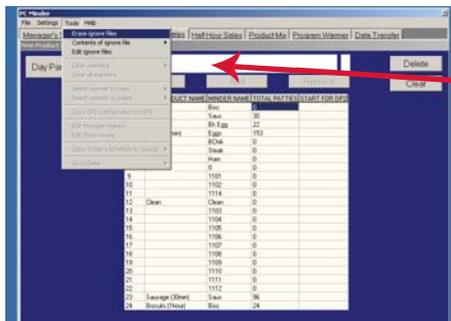

A. Open PC Minder

- Go to "New Product mix and sales" tab.
- Go to File - Open POS file
- Select the desired day.

B. Ignore, Add, Replace Products

- New products should appear in **RED** at the top of your screen.
- Ignore, ADD or Replace each item that appears in **RED**.

C. Check Ignored Files

- If not new items appear go to "Tools" and left click on "Erase Ignore Files".
- A message will appear "Are you sure you want to erase the ignore file?"
- Click YES
- Now repeat steps A and B.
- If problem persists call ICC for support.

No Quality Grade:

A. Reset Power

- On the back of the Kitchen Minder slide the ON/OFF switch to off then back on
- Verify that the grade display shows Red , Yellow Orange lights
- If the grade display does not show letter grades after a few minutes proceed to step B

B. Check Cables

- On the back of the Kitchen Minder unplugged the grey cable and re connect into Com 4
- On the grade sign unplugged the grey cable and re connect into the Minder port
- If grade sign does not come on after reconnecting the cables then replace the Grade Cable and Kitchen Minder

Kitchen Minder keeps updating:

A. Reset Power

- On the back of the Kitchen Minder slide the ON/OFF switch to off
- Wait 2 seconds and slide the ON/OFF switch to on
- Verify that the display on the Kitchen Minder shows : **“Sending Data Box 1”** and **“Sending Data Box 2”**
- After Product Status screen appears verify Minder is no longer stuck on updating
- If still stuck on Updating go to step B

B. Reinitialize Kitchen Minder

- On the back of the Kitchen Minder slide the ON/OFF switch to off
- While holding the Select Key slide the power switch to the On position
- When the text “Saving Product Mix” appears release select button.
- After Product Status screen appears verify Minder is no longer stuck on updating
- If still stuck on Updating go to step C

C. Remove Cables

- At the back of the Kitchen Minder unplug the Red Black, Blue, and Grey cables as shown
- Turn off the Kitchen Minder then back on again.
- If still stuck on Updating Call ICC for support
- If not stuck on updating Plug the Red cable into Com1 on the back of the Kitchen Minder
- Turn off the Kitchen Minder then back on again.
- If still stuck on Updating Call ICC for support
- Repeat for the other cables
- If plugging in one of the cables causes the continuous Updating to reoccur replace the cable and the black box

No QES data online:

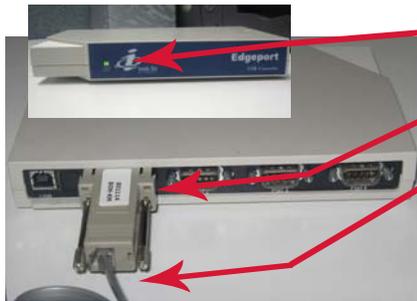

A. Check COMM Mode

- Press "Menu" on the Kitchen Minder.
- Verify the last row on the Menu screen displays **Comm Mode: Serial**.
- To change, arrow down to **Comm Mode** and press the "Select" Key to switch from IR to serial.
- Retry Data Transfer
- If successful go to Step F.

B. Replug Cable

- On the back of the Kitchen Minder, unplug the cable that is in the port labeled "Programming" and plug it back in.

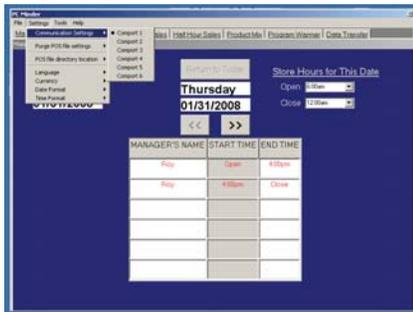

C. Check BOH Computer Corporate Restaurants

- Locate the Edgeport box and verify a flashing green status light on the front.
- Verify an adapter labeled 80114 is plugged into the back of the Edgeport box.
- Verify that a phone-like cable is plugged into the 80114 adapter.

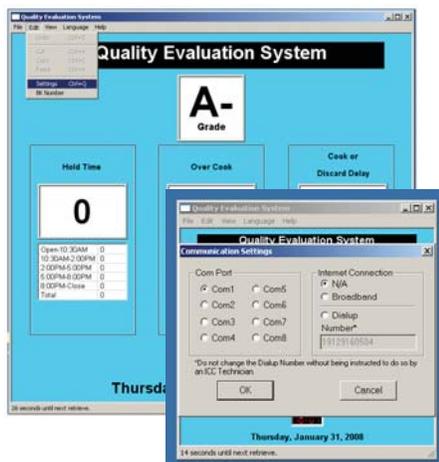

Franchise Restaurants

- Verify the 80114 is plugged into a serial port on your computer or USB serial port adapter.

D. Check PC Minder

- Open PC Minder.
- Click on Settings→ Communication settings and change the selected comport To COM 1
- Recheck a Data Transfer.
- Repeat steps above for each comport until one works.
- If Data Transfer fails for each comport call ICC for support.

E. Check QES

- If Data Transfer passes, Run QES.
- Go to Edit→ Settings.
- A window opens, choose the same comport that was working in PC Minder.

Data Transmission Failed:

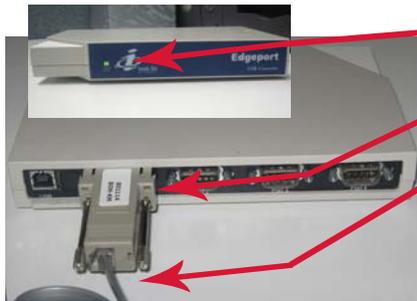

A. Check COMM Mode

- Press "Menu" on the Kitchen Minder.
- Verify the last row on the Menu screen displays **Comm Mode: Serial**.
- To change, arrow down to **Comm Mode** and press the "Select" Key to switch from IR to serial.
- Retry Data Transfer
- If successful go to Step F.

B. Replug Cable

- On the back of the Kitchen Minder, unplug the cable that is in the port labeled "Programming" and plug it back in.

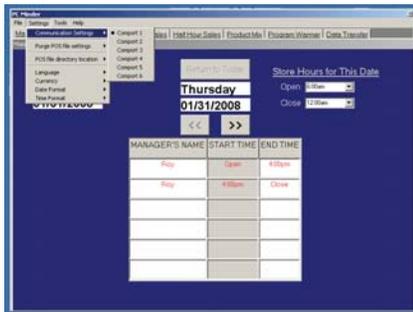

C. Check BOH Computer Corporate Restaurants

- Locate the Edgeport box and verify a flashing green status light on the front.
- Verify an adapter labeled 80114 is plugged into the back of the Edgeport box.
- Verify that a phone-like cable is plugged into the 80114 adapter.

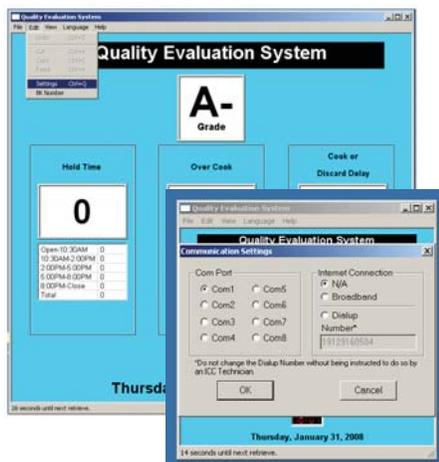

Franchise Restaurants

- Verify the 80114 is plugged into a serial port on your computer or USB serial port adapter.

D. Check PC Minder

- Open PC Minder.
- Click on Settings→ Communication settings and change the selected comport To COM 1
- Recheck a Data Transfer.
- Repeat steps above for each comport until one works.
- If Data Transfer fails for each comport call ICC for support.

E. Check QES

- If Data Transfer passes, Run QES.
- Go to Edit→ Settings.
- A window opens, choose the same comport that was working in PC Minder.

Keeps displaying PQT 1,2, or 3:

A. Reset Power

- On the back of the Kitchen Minder slide the ON/OFF switch to off
- Wait 2 seconds and slide the ON/OFF switch to on
- Verify that the display on the Kitchen Minder shows : **“Sending Data Box 1”** and **“Sending Data Box 2”**
- After Product Status screen appears verify Minder is no longer stuck on updating
- If still stuck on Updating go to step B
